EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence Ashery on July 8, 2004.

The application has been amended as follows:

Claim 4, line 4, after "grooves" insert --filled with said active material--.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to an electrode comprising a porous substrate with a plurality of grooves, wherein the pores and grooves are filled with active material.

The prior art, such as Faris et al., U.S. Patent 6,309,771, teaches a metal air fuel cell comprising a substrate (703) with pores (150) and grooves (62) (See Figs. 3A-3B). The grooves are filled with active material, but the reference is silent to filling the pores with active material. There is no teaching or suggestions in the prior art of record, to fill both the grooves and pores of an electrode substrate with active material. Therefore, the instant claims are patentably distinct from Faris.

CONCLUSIONS

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
